## COLOCACIÓN PAPEL PINTADO.

### 1.- ANTES DE COLGAR EL PAPEL PINTADO:

- Nuestros papeles pintados son de material Vinílico con base Tejido no Tejido, aplicamos la cola a la pared y colocamos cada panel en su orden correspondiente.
- Compruebe el correcto orden de los paneles del mural.
  - Utilice siempre cola adhesiva especial para Papel Tejido No Tejido / Non Woven)
  - Verifique que la pared a empapelar está en buenas condiciones.
  - Si ha estado pintada anteriormente tendremos que lijar y eliminar los restos de polvo.
  - Si estuvo empapelada, eliminar todos los restos de papel.
  - Tapar las grietas o desperfectos si los hubiese, dejar secar, lijar y limpiar.

### 2.- COMO COLGAR EL PAPEL

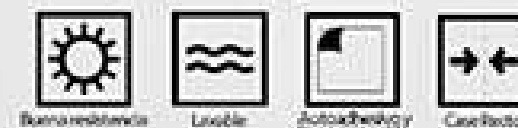

- Aplique la cola a la pared con un rodillo y pegue los paneles de uno en uno.
- Pase la espátula o rodillo con suavidad, de arriba a abajo y del centro hacia afuera para fijarlo sobre la superficie y eliminar todas las burbujas de aire.
- Coloque el siguiente panel hasta completar el mural.
- Deje que el papel se asiente durante unos 15 minutos antes de recortar la parte superior e inferior sobrante.

### 3.- DESPUÉS DE LA INSTALACIÓN

- Debe ventilar bien la habitación para dejar secar el papel de pared.
- Nuestro papel es lavable, limpie el papel con un paño húmedo con suavidad verticalmente, nunca frote. No use ninguna cinta adhesiva sobre la superficie del papel.

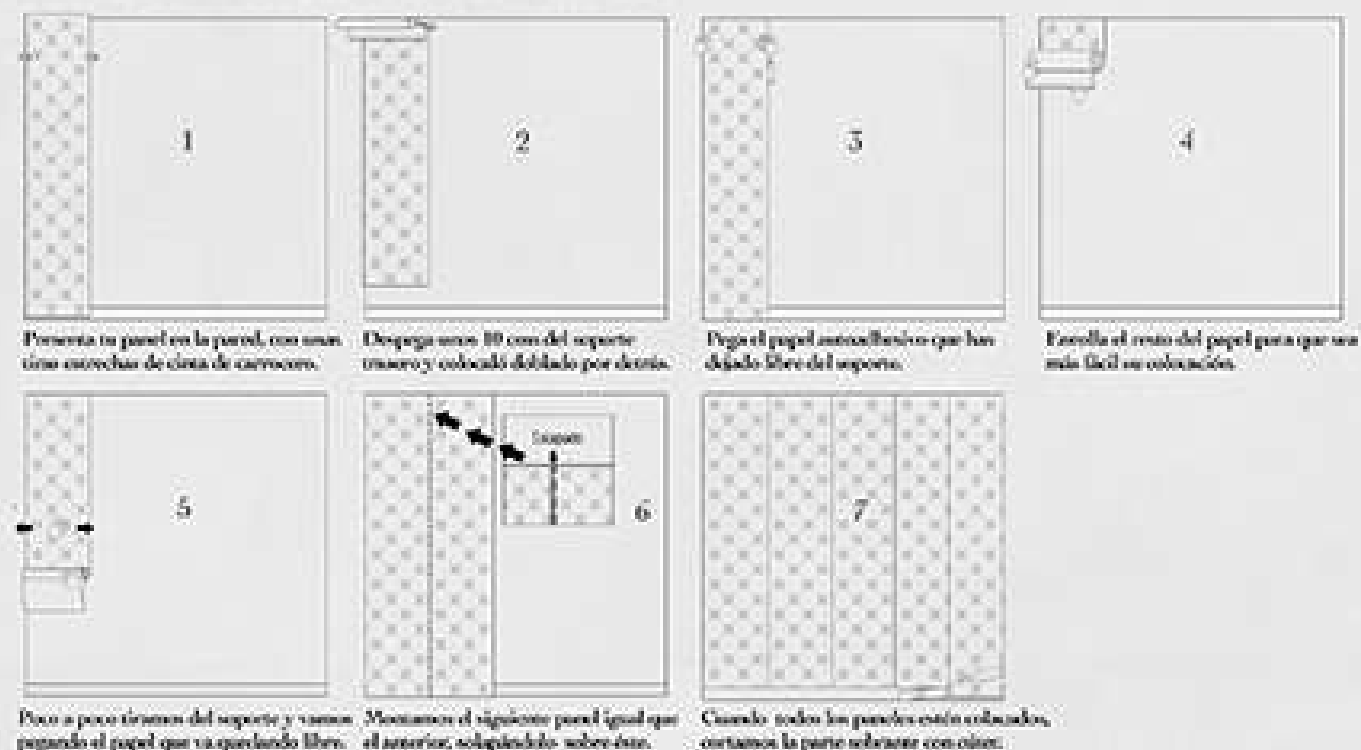

## COLOCACIÓN PAPEL AUTOADHESIVO

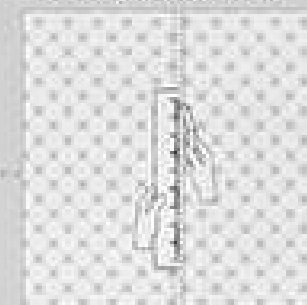

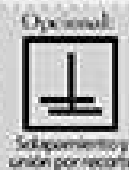

### 1.- ANTES DE COLGAR EL PAPEL AUTOADHESIVO

- La colocación de nuestros paneles autoadhesivos es muy sencilla, sólo tenemos que retirar el soporte trasero y pegarlo.
- Compruebe el correcto orden de los paneles del mural.
  - Verifique que la pared a empapelar está en buenas condiciones.
  - Las paredes deben estar limpias y sin polvo y si han sido pintadas debemos de dejarlas secar al menos 10 días, para que se sequen completamente.
  - Si estuvo empapelada, eliminar todos los restos de papel.

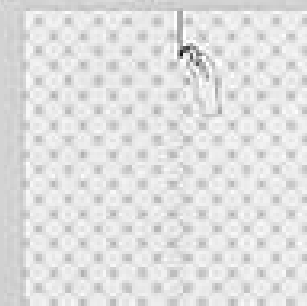

### 2.- COMO COLGAR EL PAPEL AUTOADHESIVO

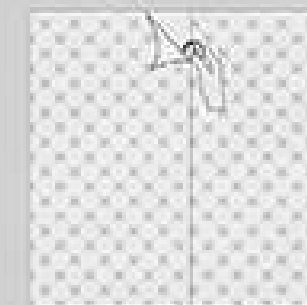

### 3.- ACABADO OPCIONAL (CORTAR SOLAPE)

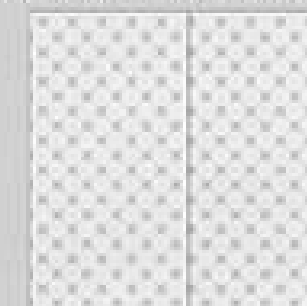

Colocamos una regla en el centro del solape y con un cizor y una regla con suficiente presión cortamos los dos paneles.

Retire la parte cortada exterior.

Levante la parte solapada y retire la parte interior.

Vuelve a pegar la parte solapada sobre la pared.
